Active Promotions (June 2026)

PAYDAY Sale — Up to 80% off -

Code: GRAB300, GRAB 2000, BOATHEAD -

Storm Call 4 Pre-book — Launches 12th June

Current Google Ads Strategy — What We Observed

Key Observations

- ✓ boAt runs paid ads on branded and direct-purchase queries
- ✓ Shopping ads active on product-specific searches (Airdopes 161)
- ✗ Zero paid presence on category keywords — "wireless earphones under 2000" shows NO boAt ad
- ✗ Same Payday creative running across different intent queries

Keyword Landscape & Coverage Gaps

Keyword	Search Intent	boAt Paid Presence	Competitor Activity	Priority
wireless earphones under 2000	Transactional	✗ Not bidding	OnePlus, Realme visible	● High
buy boat earphones online	Direct purchase	✓ Search ad running	Marketplace results	● Medium
boat airdopes 161	Navigational	✓ Shopping ads	Own brand only	● Low
boat offers today	Promotional	✓ Search + Shopping	Own brand only	● Low

Evidence — Keyword Coverage Gaps

wireless earphones under 2000" — boAt absent from paid results

buy boat earphones online" — boAt Search ad present

Audit Findings — 3 Identified Gaps

Finding 1

KEYWORD COVERAGE GAP

Observation:

boAt runs zero paid Search ads for "wireless earphones under 2000" — their highest-volume category keyword.

Evidence:

Google SERP shows OnePlus & Realme in paid positions.
boAt only appears organically.

Impact:

High-intent buyers comparing brands are captured by competitors at the exact moment of purchase decision.

Finding 2

SALE-DEPENDENT AD COPY

Observation:

All active Search ads are built around "Payday Sale" messaging with no evergreen RSA variants running in parallel.

Evidence:

Identical creative running for "buy boat earphones online" and "boat offers today" — different intents, same ad.

Impact:

When Payday sale ends, ad copy becomes irrelevant. No feature-led or USP-led alternatives to maintain CTR.

Finding 3

GENERIC SITELINK ANCHORS

Observation:

Sitelinks use vague discount claims instead of product-specific anchors with names, prices, or features.

Evidence:

"Enjoy 80% Discount On boAt"
vs best practice:
"Airdopes 161 – ₹899 | 40Hr"

Impact:

Lower sitelink CTR — users respond better to specific product value anchors than generic percentage claims.

Recommendations & Expected Impact

Finding	Recommendation	Action	Expected Impact
1 — Keyword Gap	Expand to category keywords	Add "wireless earphones under ₹2000" + 5 long-tail variants as exact/phrase match with dedicated ad group	Capture high-intent buyers currently lost to OnePlus & Realme
2 — Sale Copy	Build evergreen RSA	Create 15 headline variants: 5 feature-led ("40Hr Playback"), 5 price-led ("From ₹799"), 5 USP-led ("Free Warranty")	CTR maintained post-sale; broader A/B testing improves Quality Score
3 — Sitelinks	Product-specific anchors	Replace generic sitelinks with: "Airdopes 161 – ₹899", "Nirvana Ion – 120Hr", "Rockerz 255 – ₹799"	Higher sitelink CTR through specific product value anchors

Summary

boAt Lifestyle runs an active Google Ads presence on branded and direct-purchase queries, with strong Shopping ad coverage on product-specific searches. However, three structural gaps limit campaign effectiveness at the category and awareness level.

● Finding 1 — Keyword Coverage Gap

No paid presence on "wireless earphones under 2000" — conceding top-of-funnel category traffic to OnePlus & Realme.

● Finding 2 — Sale-Dependent Ad Copy

Creative strategy tied entirely to Payday Sale — no evergreen RSA variants to sustain CTR post-sale.

● Finding 3 — Generic Sitelink Anchors

Sitelinks lack product-specific names, prices, and features — missing higher-intent clicks through value anchors.

Addressing these gaps through keyword expansion, RSA diversification, and sitelink optimisation would strengthen boAt's search presence at both the category and brand level.
